

SÈVRES AT PAD PARIS

EXHIBITION
2 – 5 APRIL 2020

TUILERIES GARDEN

From the purity of biscuit porcelains to the vitality of coloured enamels, Sèvres presents a series of creations born of collaborations between the Manufacture de Sèvres and renowned designers and contemporary artists.

For its 13th participation in PAD Paris, Sèvres invites art & design enthusiasts as well as collectors to discover its creations within a scenography comprising two distinct ambiances:

- The colourful world of Sèvres' infinite palette, presenting pieces by Pierre Charpin, caped vases by matali crasset, indoor fountains by Arthur Hoffner and vases by Ettore Sottsass.
- The pure white world of biscuit porcelain, with kinetic works by Julio Le Parc, Sakura vases by nendo and pieces imagined by Christian Renonciat.

Creations by Emmanuel Boos, Kristin McKirdy and Jacques-Emile Ruhlmann beautifully bridge both worlds.

PAD Paris represents the perfect opportunity for Sèvres to present past and present works to lovers of art and design.

ARTISTS INVITED TO SÈVRES

The Manufacture Nationale de Sèvres invites artists and designers from around the world. Its repertoire of several hundred forms, its palette of over a thousand colours and the collections of the Sèvres Museum constitute an inexhaustible source of inspiration for guest creators. They appropriate the unique, fascinating material that is porcelain and draw nourishment from their constant dialogue with Sèvres' skilled artisans. In this manner, Sèvres' history and heritage are perpetually enriched by new creations, subsequently acquired by collectors, cultural institutions and the Palaces of the French Republic.
